DR. KEN KONOPKA

In this course students learn about American culture while developing and refining their English conversation and discourse skills. We focus on strategies and skills needed to comfortably and confidently contribute to any discussion. Class conversations focus on various aspects of American culture and provide tools for developing meaningful conversations in both academic and personal settings. The course is designed for non-native English speakers and will address performance on activities including oral proficiency exams, presentations, teaching, and day-to-day social interactions.
